

PAPI 2018

The Viet Nam Provincial Governance and Public Administration Performance Index: Citizens' Experiences

Measuring

Province: **Ha Giang**

Dimensional Scores 2018

PAPI measures the standards of governance and public administration drawn from citizens' experiences when interacting with governmental authorities. As a tool to monitor performance PAPI contributes to accelerate continued progress in governance and public administration performance. In an environment reliant on "self-assessments" by government stakeholders to measure government performance, PAPI helps provide a bottom-up perspective, by studying people-centred experiences.

This provincial profile presents an initial overview of the main results and key findings at both the dimension and subdimension level. It also explains graphically the actual scores for the respective province and places it in comparative perspective with the best performing provinces and with itself over time. This will be useful for provinces hoping to identify good practices and to excel in performance.

2018 Overall Governance and Public Administration Performance

* Dimensions with some changes to indicators and sub-dimensions

^ New Dimensions from 2018

Since 2009 PAPI has collected responses from nearly 117,363 citizens across all 63 provinces making it the largest governance and public administration performance survey in the country. In 2018 PAPI was replicated with a total sample of 14,304 citizens directly interviewed.

Dimensional Scores Against Maximum Scores (2018): Ha Giang

Note: Dimensional Scale is from 1 (min) to 10 (max) points

Sub-dimensional Scores (2011-2018): Ha Giang

Note: Due to changes made to most of the dimensions, year-to-year comparison only works for Dimension 5 "Public Administrative Procedures" for 2018 PAPI.
